4. Daily plant capacity is approximately three carloads of metalware manufactured from 0.5 millimeter sheet iron, steel, and aluminum. Sheet metal is obtained for the most part from the Jesenice Steel Combine. Production includes several types of sheet metal items, such as magazines for infantry ammunition, ammunition cases, spare parts for gas masks, parts for small gasoline engines, and pressed parts for weapons. Reserve stocks include an unspecified, but large quantity of Soviet-manufactured sheet aluminum.
5. The Saturnus Factory employs 450 workers, including 225 women and approximately 120 young people between 14 and 18 years of age. The young workers form the so-called labor brigades.
6. Key personnel of the Saturnus Factory are:
 - a. Albin Vipotnik, director, member of the Central Committee of the Slovene Communist Party.
 - b. Dusan Zadavec, secretary, Communist.
 - c. Anton Ahlin, personnel clerk, Communist.
 - d. Engr. Lovro Vrecko, chief technical managing director.
 - e. Anton Veter, commercial director.
 - f. Konrad Kumar, chief of department, Communist.
 - g. Anton Lulik, chief of department, Communist.
 - h. Edo Decman, chief of the machine shop, Communist
 - i. Vekoslav Bergant, chief of the varnishing section.
